# BODY TRAINER

## The Genesis

It is designed to be your night-time Personal Wellness Assistant.

The top layer in Memory Fresh Blue supports your body by avoiding compression points.

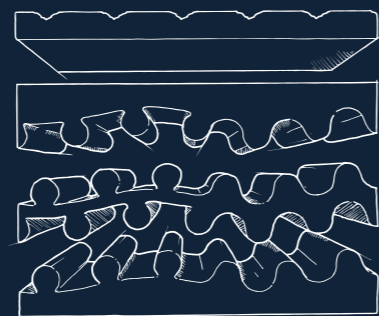

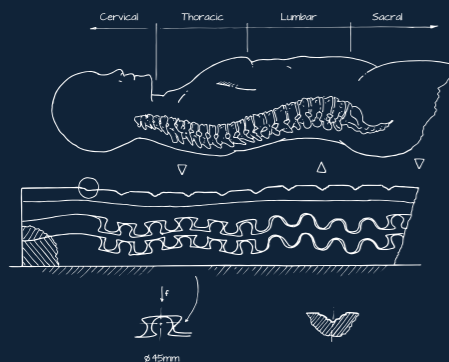

The particular internal structure with opposed rolls supports any horizontal movement thanks to intermediate layers that roll.

The rolls also allow responsive support, depending on one's weight and pressure on specific areas of the mattress.

The result is: no compressions, freedom of movement, and progressive support in relation to weight.

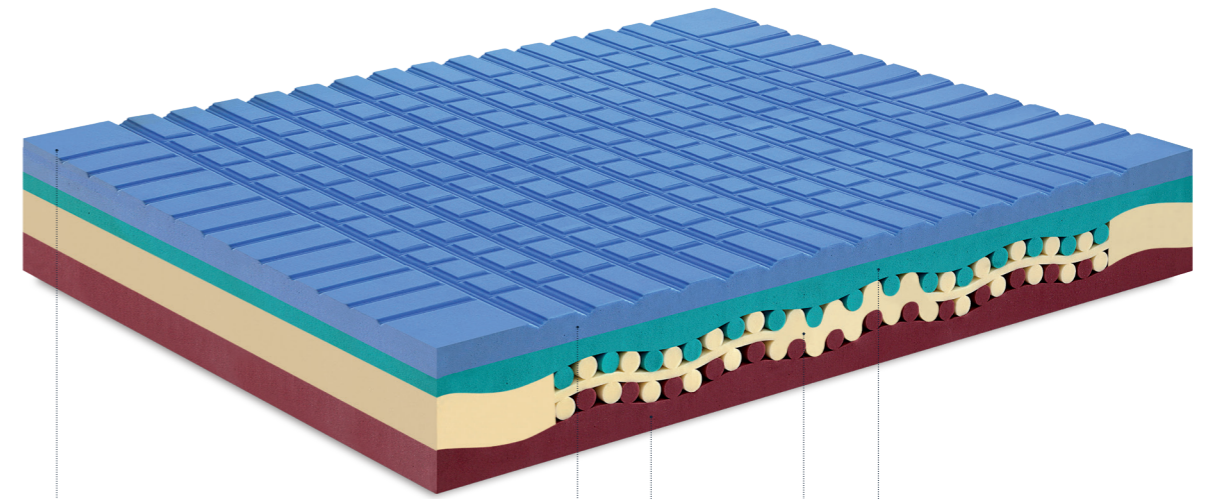

### 2018 drafts and studies

#### Personal Trainer

Manifattura  
**FALOMO®**

*The attention to many small details  
make a project unique*

#### MEMORY FRESH BLUE (DN 55)

The Memory Fresh Blue layer decompresses and preserves an ideal temperature.

#### ORANGE HD (DN 60)

Layer of very high density foam to guarantee an elastic support and enriched with orange blossom essential oil.

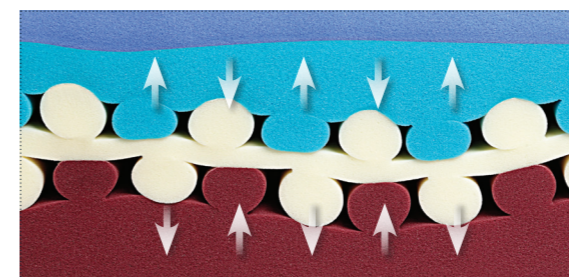

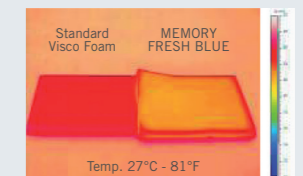

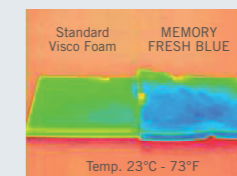

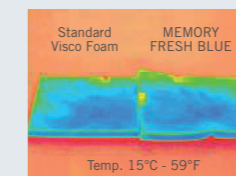

#### SOIA (DN 50)

High density soy-based foam  
50 Medium

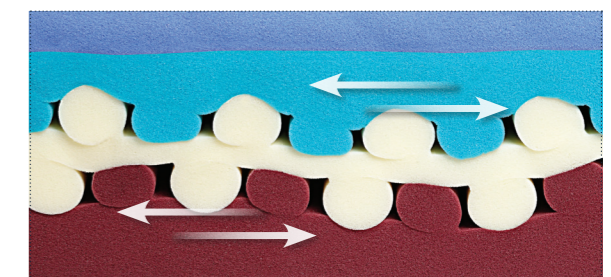

#### SOIA (DN 40)

High density soy-based foam  
40 Firm

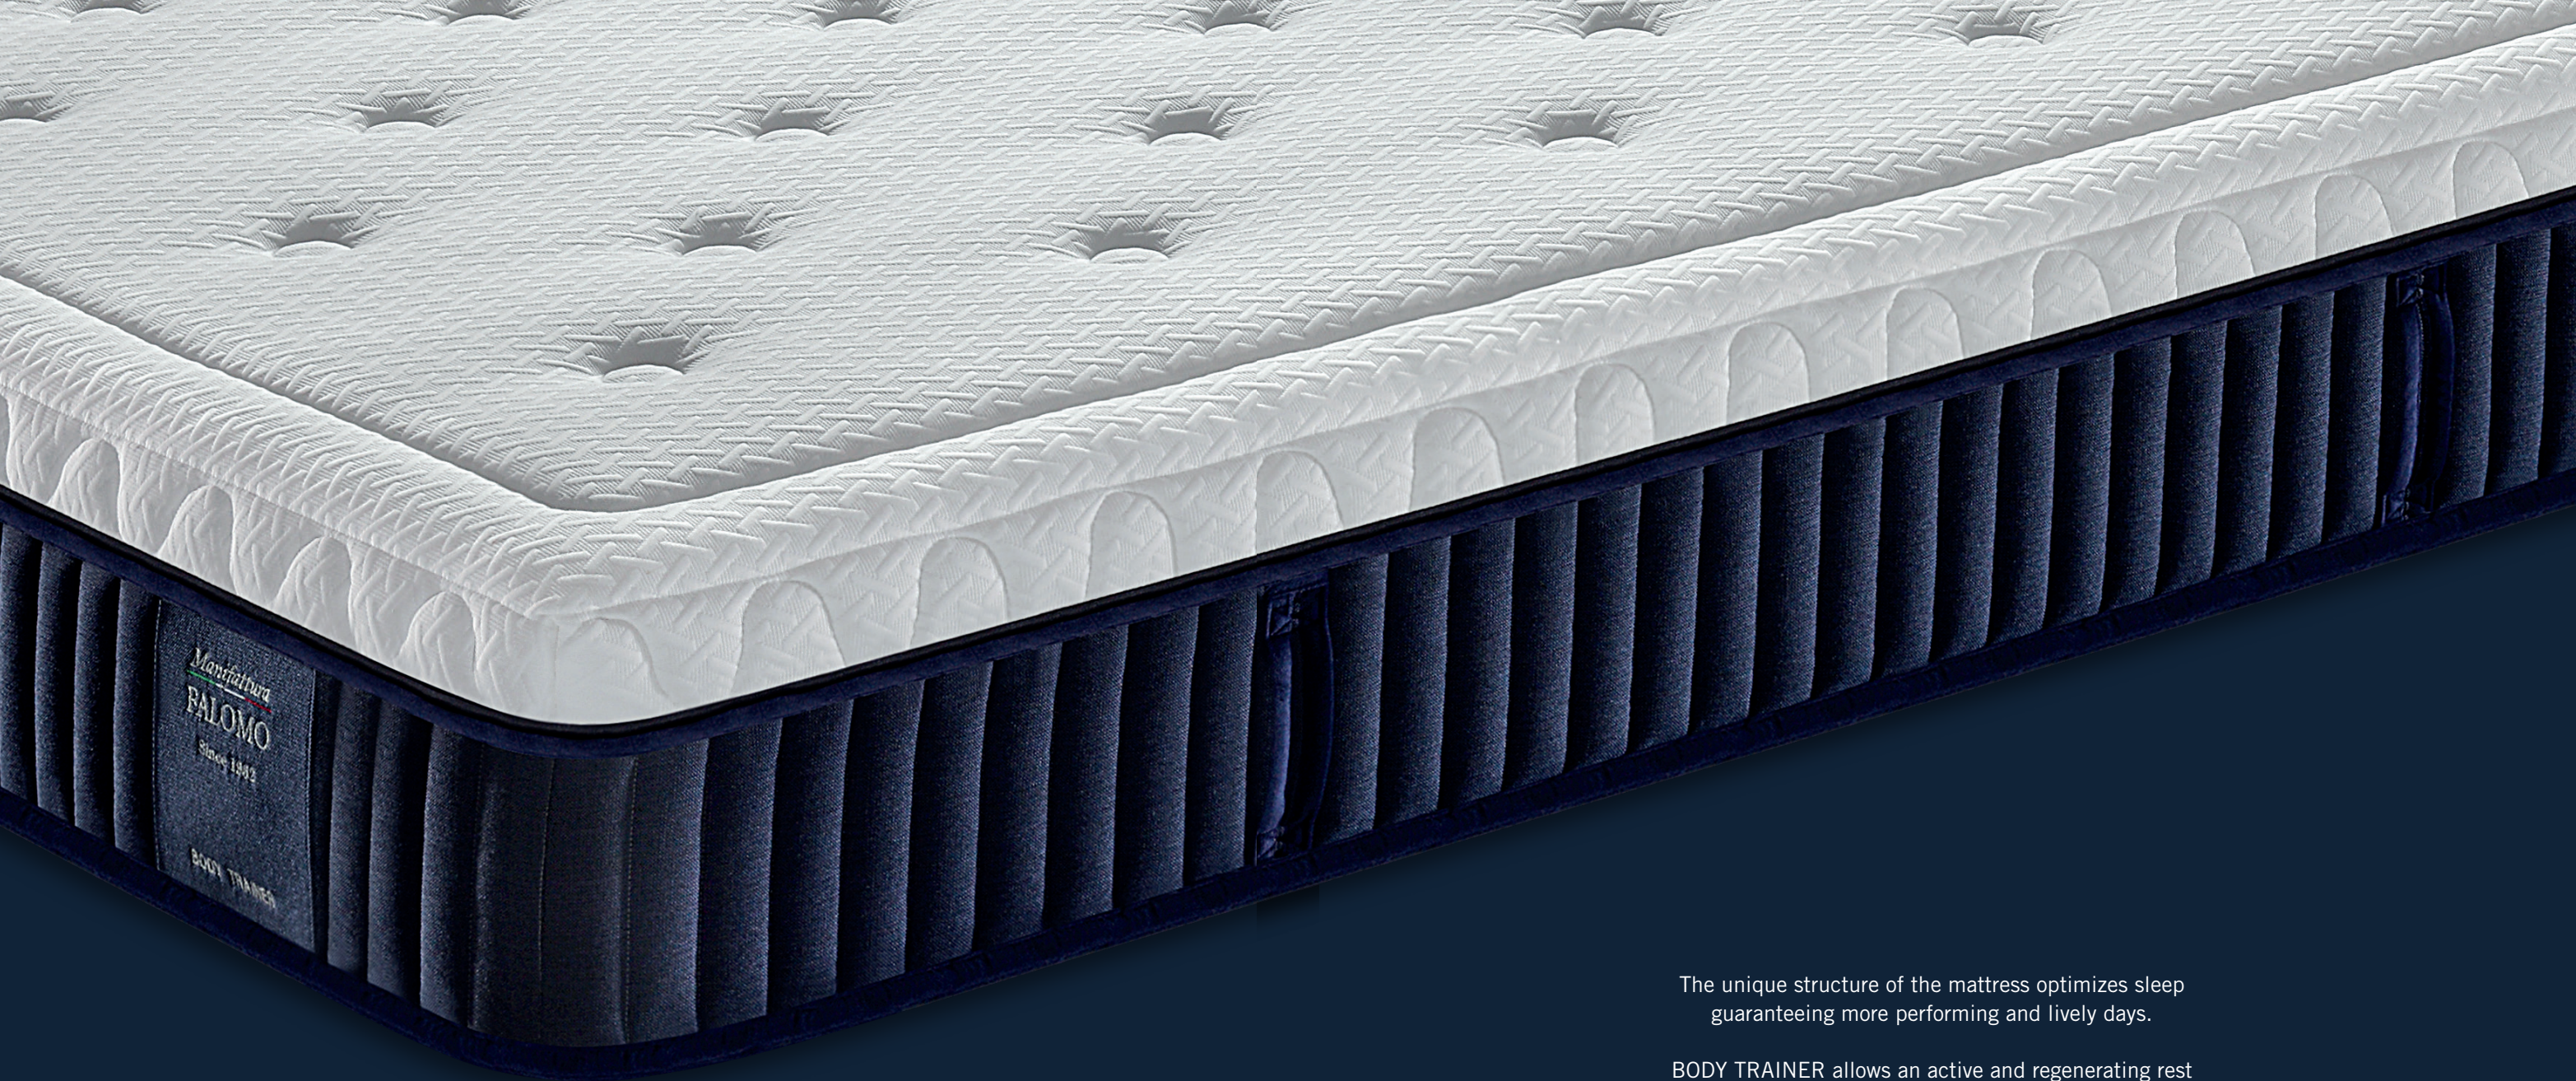

Memory Fresh Blue keeps a lower average temperature compared to traditional memory foams. AITEX® thermography tests efficiently demonstrate this thermal functionality.

The particular structure allows responsive and well-balanced comfort.

The advanced technology with opposed rolls fully supports your movements during sleep and favors the stretching of your spine

The unique structure of the mattress optimizes sleep guaranteeing more performing and lively days.

BODY TRAINER allows an active and regenerating rest and sets the ideal conditions to help you face each new day.

The internal structure offers high biomechanical features, while the external finishing is tailor-made.

*Your personal wellness assistant*

“Sports Technology Support” includes a whole range of products which are particularly suitable for professional and non-professional athletes thanks to the materials used and their composition.

Born from research and innovation applied to “rest”. Designed and tested with the collaboration of athletes and professional sports teams, they contribute to improving performance and night-time recovery.

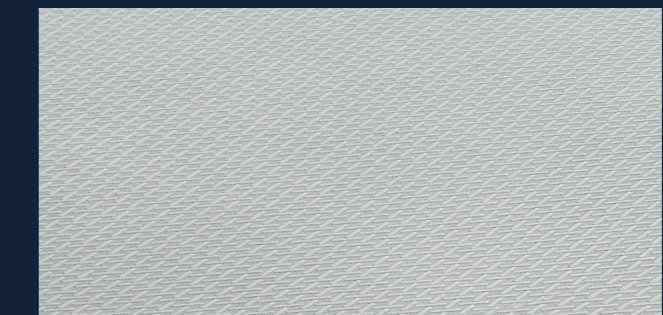

THE REASONS FOR AN EXCLUSIVE CHOICE

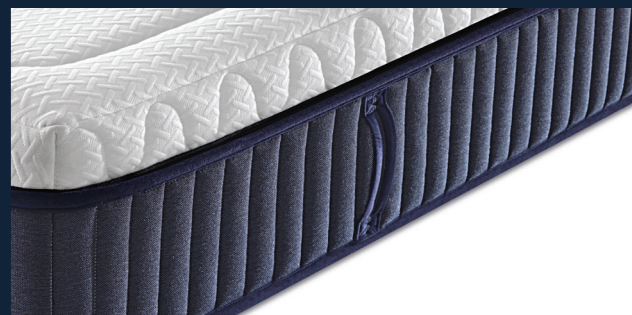

**MICROTENCEL® COVER**  
It helps keep your body temperature neutral for maximum comfort all year long. Extremely pleasant to the touch. Cover washable up to 60° C.

**SOLOTEX™**  
The most non-deformable and breathable washable padding is a fresh, hygienic, and long-lasting product.

**MICROTENCEL® FRESH**  
A second cover is placed underneath the upper panel. Made with the same fabric but in gray, this cover is suitable during hot seasons thanks to its PCM FRESH nanotechnology treatment.

**ELEGANT SIDE BAND**  
The hand-finished fabric characterizes the whole structure by adding a touch of elegance.

Attention to detail

2 During warmer months, remove the upper panel and rest on the second cover made of Microtencel® Fresh.

1/3 The decorative corner turns into a practical bag to store the top panel, optimizing spaces.

It favors night-time stretching.
